

# Cottingham & Butler

Rather than a one-size-fits-all approach, our proprietary Risk Management Assessment (RMA) process provides a complete roadmap for optimizing each client's unique insurance program across coverage, risk transfer options, claims management, and loss prevention.

## RISK MANAGEMENT ASSESSMENT

# The Cottingham & Butler Advantage

The Cottingham & Butler RMA provides new insight and awareness, and many times an education on 'what you don't know', with guidance around how to address each finding. The RMA is a tangible work product, very different from the typical broker 'promise to deliver'. It is the demonstration of our knowledge and capabilities, with a deliverable that is 100% customized to your situation.

Cottingham & Butler has organized the RMA to illustrate program deficiencies in the following areas:

<b>Program Design</b>	Is your program the best for you? Program Structure   Marketplace Feedback   Premium Benchmark
<b>Coverage Review</b>	What is really in those policies? Deficiencies   Coverage Gap Analysis   Recommendations
<b>Claims Analysis</b>	What is driving direct and indirect costs? Analysis   Benchmarking   Best Practices
<b>Safety Assessment</b>	Preventing claims from occurring in the first place? Current Services (carrier/broker)   Opportunities   Best Practices
<b>Risk Management</b>	How good are your Risk Management functions and processes? Safety Performance Gaps   Targeted Resources   Cost-Effective Solutions
